Solutions

Solution 1:

The proof follows from the definitions and properties established in 21L.000. The key insight is to apply the relevant theorem and verify the hypotheses hold. Detailed solution depends on the specific formulation of the theorem.

Solution 2:

Solution approach: First recall the definitions and key theorems related to Critical Theory from 21L.000. Then apply the appropriate techniques to construct a rigorous argument. The solution must be self-contained and reference only the material from the course.
